

Nuveen Churchill Private Credit Income Fund

Fund Report | As of 31 Jan 2026

Nuveen Churchill Private Credit Income Fund (“Fund”) is an Australian Unit Trust registered as a managed investment scheme investing into Nuveen Churchill Private Capital Income Fund (“Underlying Fund”)

Fund objective

The Fund, via its investment in the Underlying Fund, seeks to provide investors with risk-adjusted returns primarily through current income and, secondarily, long-term capital appreciation, by investing in a diversified portfolio of private debt and equity investments in U.S. middle market companies owned by leading private equity firms.

Underlying Fund portfolio update

In January, the Underlying Fund's asset allocation consisted of 93.0% first lien senior secured, 2.8% second lien senior secured, 2.2% mezzanine debt, and 2.0% equity co-investments, with a diversified portfolio of 324 companies. The Underlying Fund's investment portfolio at fair value is U.S. \$2.2 billion and net asset value (NAV) is U.S. \$1.4 billion as of January 31st.

As part of the Underlying Fund's strategy, top industry exposures included Services: Business (18.3%), Healthcare & Pharmaceuticals (14.4%), High Tech Industries (8.1%), Capital Equipment (8.0%), Banking, Finance, Insurance, & Real Estate (6.8%), Construction & Building (6.5%), Beverage, Food & Tobacco (4.8%), Environmental Industries (4.2%), Utilities: Electric (3.9%), and Services: Consumer (3.6%). The Underlying Fund has a 0.31% average position size. Industry allocations will naturally evolve over time as the portfolio grows, with the investment team maintaining their disciplined approach to diversification across issuers, vintages and sectors while prioritizing credit quality in non-cyclical, defensible industries.

The Underlying Fund's investments are 100.0% private equity sponsor-backed loans and are comprised of 95.9% senior secured loans. The weighted average annual EBITDA of the underlying portfolio companies is US\$88.3 million. Additionally, 95.8% of the debt investments across the Underlying Fund's portfolio are floating rate. The fund has a weighted average loan-to-value of 40.6%*.

This Performance data shown represents past performance. The value of an investment can rise and fall and past performance is not indicative of future performance. The returns stated are based on the Class A month-end unit prices expressed in Australian Dollars. The net return of the Fund has been calculated after the deduction of management fees and operating costs. Please note that these figures do not factor in the potential tax obligations at an individual investor level. This is historical performance data. Investors are reminded to seek independent financial advice before making investment decisions based on this performance data. All figures disclosed within this report are net of GST and RITC.

These charts and tables (together, the "Figures") are provided by the Underlying Fund Investment Manager and are meant for illustrative purposes only and should not be relied upon for making investment decisions. They do not represent direct information about the Fund or its performance. The Figures are for the Underlying Fund and the Fund's exposure to these asset holdings and sectors may vary as it invests in the Underlying Fund. Therefore, the Fund's actual performance and strategic alignment may differ from what is inferred from the figures. The future performance of the Fund cannot be predicted based on the data presented here, and the Fund's performance is subject to market risks and other investment risks as detailed in the Fund's Product Disclosure Statement.

1. Weighted Average EBITDA: Includes all private debt investments for which fair value is determined by the Board of Trustees in conjunction with third-party valuation firms and excludes quoted assets. Including all quoted assets, our portfolio companies had a weighted average EBITDA of \$197M. EBITDA amounts are derived from the most recently available portfolio company financial statements and are weighted based on fair market

value of each respective investment. Amounts have not been independently reviewed by us and may reflect a normalized or adjusted amount. Accordingly, we make no representation or warranty in respect of this information.

- Excludes quoted assets.
- Average position size is calculated as a percentage of total fair value of the investment portfolio.
- Floating Rate: As a percentage of debt investments in the Underlying Fund portfolio, which represents 98.42% of investments excluding equity co-investments.
- Industry diversification based on Moody's industry breakdown. Measured based on the fair value of investments for each category against the total fair value of all investments. Totals may not sum due to rounding.
- Allocations exclude exposures to fund level cash and are adjusted pro-rata to equal 100%.
